

## **CLUB AIRCRAFT**

**180HP Piper Cub BKJ** is a tail wheel, high wing aircraft.

**180HP Piper Pawnee PNE** is a tail wheel, low wing aircraft

**Puchacz two seat glider GPZ** is used by pilots beginning their gliding training. This glider was manufactured in Poland and is designed especially for training of student pilots.

**Taurus two seat glider GSU** with sustainer engine for more advanced cross country flying training.

**Duo Discus Turbo two seat glider GXT** high performance glider for serious cross country flying. This aircraft has a sustainer engine which may be used in cases where a land out is likely to occur.

**LS4 single seat glider GKM** was manufactured in Germany. This model is recognised as an excellent cross country and competition capable glider. It can be flown in a variety of gliding competitions as well as being gentle enough for recreational pilots.
